Colombian

Profile

Front End developer passionate about software development with web technologies. I'm a Systems and Computing Engineer at Los Andes University, responsible and creative. I have about 4 years of experience working with libraries and frameworks like React JS, Vue JS, Gatsby, React Native, and Flutter.

I like to be open to learn new things and share my knowledge with more people. I have the ability to constantly increase my productivity through efficient time management and a good organization of ideas. I enjoy working in dynamic and cooperative environments where communication is fundamental. I am focused on my constant growth, personally and professionally.
